HELPFUL - HUMBLE - HONEST - HEART DRIVEN

— HAPPY — Retirement Karen!

I shared with some of you about my grandfather's concern with hiring Karen in 1971 as she was just out of college and had limited experience. He was afraid she wouldn't stay. And then once she came we couldn't get her to leave! My grandfather was a pretty smart guy, but that was one of the things he was mistaken about. Karen was one of the company's first hires, possibly one of the first 10, certainly within the first 20. She did Accounts Receivable and worked on an old Burroughs office machine before we bought our computer. I know that none of you have any idea what that even is.

Karen, along with recently retired Wayne and Gary, and several other office ladies was part of our core founding team here. She committed her life, well certainly her working life, to the betterment of our business. She has always been so very concerned about doing things completely and correctly. We so much appreciate her for her friendship and commitment.

I have to include my father and grandfather's time when they were building welders in my grandfather's ON Haun and Son business with the time they spent in the welding supply business to get close to the total time that Karen has spent here at Haun, over 50 years. And I have to include my time when I came in on Saturdays to clean the offices and showroom, when I was 12, to get close to the number of years she has worked here. That is amazing. People just don't do that anymore.

We have been blessed by her.
