

From first-time welders to experienced professionals, our hands-on welding programs are designed to build skills, confidence, and success. Train in our professional welding facility using modern equipment while receiving personalized instruction from experienced professionals focused on real-world applications.

STUDENT PPE REQUIREMENTS

For the safety of all students, proper Personal Protective Equipment (PPE) is required for all welding classes. Students are responsible for providing their own PPE.

- ✓ Welding helmet with Shade 10 lens
- ✓ Safety glasses
- ✓ Welding jacket
- ✓ Welding gloves
- ✓ Steel toe boots
- ✓ Long pants with no rips or holes

Need PPE? Student PPE packages are available for purchase at Haun Welding Supply before your first day of class.

BASIC WELIDING

32-Hour Course | \$650
First Week of Each Month

Build a Strong Foundation

Designed for beginners, this hands-on course introduces the fundamentals of safe welding practices, equipment setup, and the basic principles of Stick (SMAW) and MIG (GMAW) welding.

Course Highlights

- ✓ Welding safety and shop practices
- ✓ Oxy/fuel cutting, brazing, and setup
- ✓ Stick (SMAW) welding fundamentals
- ✓ Welder setup and machine selection
- ✓ Filler metal breakdown
- ✓ Out of position welding

Perfect For

- Beginners
- Hobbyists
- Entry-level welders
- Employers training new team members

INTERMEDIATE WELIDING

32-Hour Course | \$775
Second Week of Each Month

Advance Your MIG Welding Skills

Designed for welders with a basic understanding of welding, this hands-on course builds confidence in MIG (GMAW) welding through advanced techniques, equipment setup, and out-of-position welding.

Course Highlights

- ✓ MIG (GMAW) welding fundamentals
- ✓ Equipment selection and setup
- ✓ Shielding gas selection
- ✓ Arc manipulation and control
- ✓ Out-of-position welding
- ✓ Introduction to aluminum welding
- ✓ Spray transfer and pulse welding techniques

Perfect For

- Students who have completed Basic Welding
- Welders looking to improve their MIG skills
- Fabricators and maintenance personnel
- Employers developing employee skills

ADVANCED WELIDING

32-Hour Course | \$850
Third Week of Each Month

Master Precision TIG Welding

Take your welding skills to the next level with advanced hands-on TIG (GTAW) training. This course focuses on machine setup, weld quality, and the techniques needed to produce clean, precise welds on both carbon steel and aluminum.

Course Highlights

- ✓ TIG (GTAW) welding fundamentals
- ✓ Machine setup and amperage selection
- ✓ Tungsten selection and preparation
- ✓ AC/DC polarity and waveform control
- ✓ Carbon steel welding techniques
- ✓ Aluminum welding techniques
- ✓ Welding a variety of material thicknesses

Perfect For

- Experienced welders looking to expand their skills
- Students who have completed Intermediate Welding
- Fabricators and production welders
- Employers developing advanced welding capabilities

BASIC WELIDING (NIGHTS)

12-Hour Course | \$525
Class Dates Vary by Location
Offered in Syracuse & Watertown

Learn the Fundamentals on Your Schedule

Perfect for beginners looking to explore welding without the commitment of a full-length course. This evening program provides hands-on instruction in welding safety, equipment setup, and the fundamentals of Stick (SMAW) and MIG (GMAW) welding.

Course Highlights

- ✓ Welding safety and shop practices
- ✓ Oxy/fuel safety and equipment setup
- ✓ Stick (SMAW) welding fundamentals
- ✓ MIG (GMAW) welding fundamentals
- ✓ Welder setup and basic techniques
- ✓ Introductory TIG welding exposure

Perfect For

- Beginners with little or no welding experience
- Hobbyists and DIY enthusiasts
- Homeowners and farmers
- Anyone interested in learning the basics of welding

ADV. WELIDING (NIGHTS)

12-Hour Course | \$525
Class Dates Vary
Offered in Syracuse & Watertown

Build Your TIG Welding Skills

Designed for individuals with prior welding experience, this hands-on evening course focuses on the fundamentals of TIG (GTAW) welding. Learn the techniques and machine settings needed to produce clean, precise welds while building confidence with one of the industry's most versatile welding processes.

Course Highlights

- ✓ TIG (GTAW) welding fundamentals
- ✓ Machine setup and equipment selection
- ✓ Tungsten selection and preparation
- ✓ Arc control and welding techniques
- ✓ Carbon steel welding
- ✓ Hands-on instruction in a professional training environment

Perfect For

- Welders looking to develop TIG welding skills
- Students who have completed Basic Welding
- Fabricators and maintenance personnel
- Employers looking to expand employee capabilities

CUSTOM TRAINING

Typically 32-Hour Courses
Scheduled to Meet Your Needs
Available in Syracuse, Watertown, or On-Site

Training Built Around Your Business

Our customized welding training programs are tailored to your company's specific processes, equipment, applications, and skill levels. Whether you're onboarding new employees or developing experienced welders, we'll create a hands-on training program designed to help your team work more safely, efficiently, and confidently.

Program Benefits

- ✓ Customized to your processes and applications
- ✓ Hands-on instruction
- ✓ Flexible scheduling and locations
- ✓ Improve employee skills and productivity
- ✓ Reinforce safe welding practices

Contact us to discuss a customized training program for your team.
